Sacrena Chat iOS App

This is an iOS chat application built using Swift and UIKit. It leverages the **MVVM architecture** and integrates with the **GetStream** chat service to allow users to sign in and participate in chat channels.

Features

- **Login Screen**: Users can input their username and sign in.
- **Chat List Screen**: Displays a list of available chat channels.
- **Compose New Chat**: Users can create new chat channels.
- **Custom UI**: The app uses UIKit with custom views, including styled text fields and buttons.
- **GetStream Integration**: GetStream is used for chat functionality.
